Design Hub

The advantage you need to
stay ahead of the competition.

What is Design Hub?

Design Hub is a Focused Space for AEC to Discover & Specify Your Products

Focused on capturing AEC traffic to specify your products, our in-house team with 25+ years of expertise manages everything. Design Hub makes your product and design content easily accessible, provides exclusive AEC insights, and gives you a competitive edge.

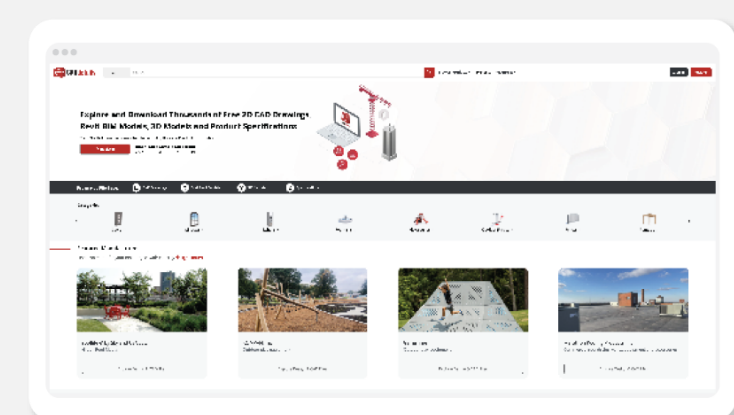

Customized for
AEC Professionals

Your Website

CADDetails Website

Why Use Design Hub?

Improve Brand Experience

Offer a streamlined product experience for AECs to find and specify your products with ease.

Unique AEC Data Insights

Use insights from proprietary data to refine your business and product strategies.

Save Time & Resources

Our team manages the content on your branded site so you can focus on your core business activities.

Improve Brand Experience

Create a seamless UX experience for your AEC professionals so they can easily find your products for upcoming projects.

Improve Brand Experience

Product Library

Our well-organized product libraries are designed to help AEC professionals efficiently find the products they need for their next project.

Project Showcase

Our platform showcases your products in real-life settings, providing tangible proof of their usage. This sparks inspiration among design professionals and greatly improves the chances of your products being specified.

The screenshot displays the website's header with the Paris logo, navigation links (PRODUCTS, PROJECTS, CONTACT, LOGIN), and a search bar. The main content area features a title, a descriptive paragraph, and two call-to-action buttons: 'View Product Library >' and 'View Projects Library >'. A large image of a fire pit is shown on the right. The footer contains additional navigation links and a feedback prompt.

PARIS Site Furnishings • Outdoor Fitness

Paris Site Furnishings & Outdoor Fitness

Paris Site Furnishings and Outdoor Fitness is committed to Creating Lasting Impressions with our complete line of site furnishings - benches, trash containers, bike racks, sports field equipment, planters, shade furnishings and more – to make your park memorable. We know that community parks are more than just green spaces; they are where memories are made. Access our design files including CAD and project information through our Design Hub.

Explore CAD Drawings, BIM files, Specifications and Technical Resources.

Unique AEC User Data

Use insights from proprietary data to refine
your business and product strategies.

Unique AEC Data

Use insights from proprietary data to refine your business and product strategies.

Identify Interested Firms Actively Viewing Your Products

Track which users and firms view your content, along with their locations and the frequency of their visits. Have your sales and marketing team follow up promptly while the lead is hot to shorten the sales cycle.

Product Insights and Innovation

Identify trending content to guide your upcoming product initiatives and marketing campaigns. Customize your next campaigns based on your insights for more personalized outreach.

Unique AEC Data

Use insights from proprietary data to refine your business and product strategies.

Identify Cross-Sell Opportunities

You can significantly shorten your sales cycles by identifying customers who engage with new products or categories. This proactive strategy enables you to offer additional product information, leading to increased sales and enhanced customer satisfaction.

Inform Your Customer Journey, Personas, and Segments

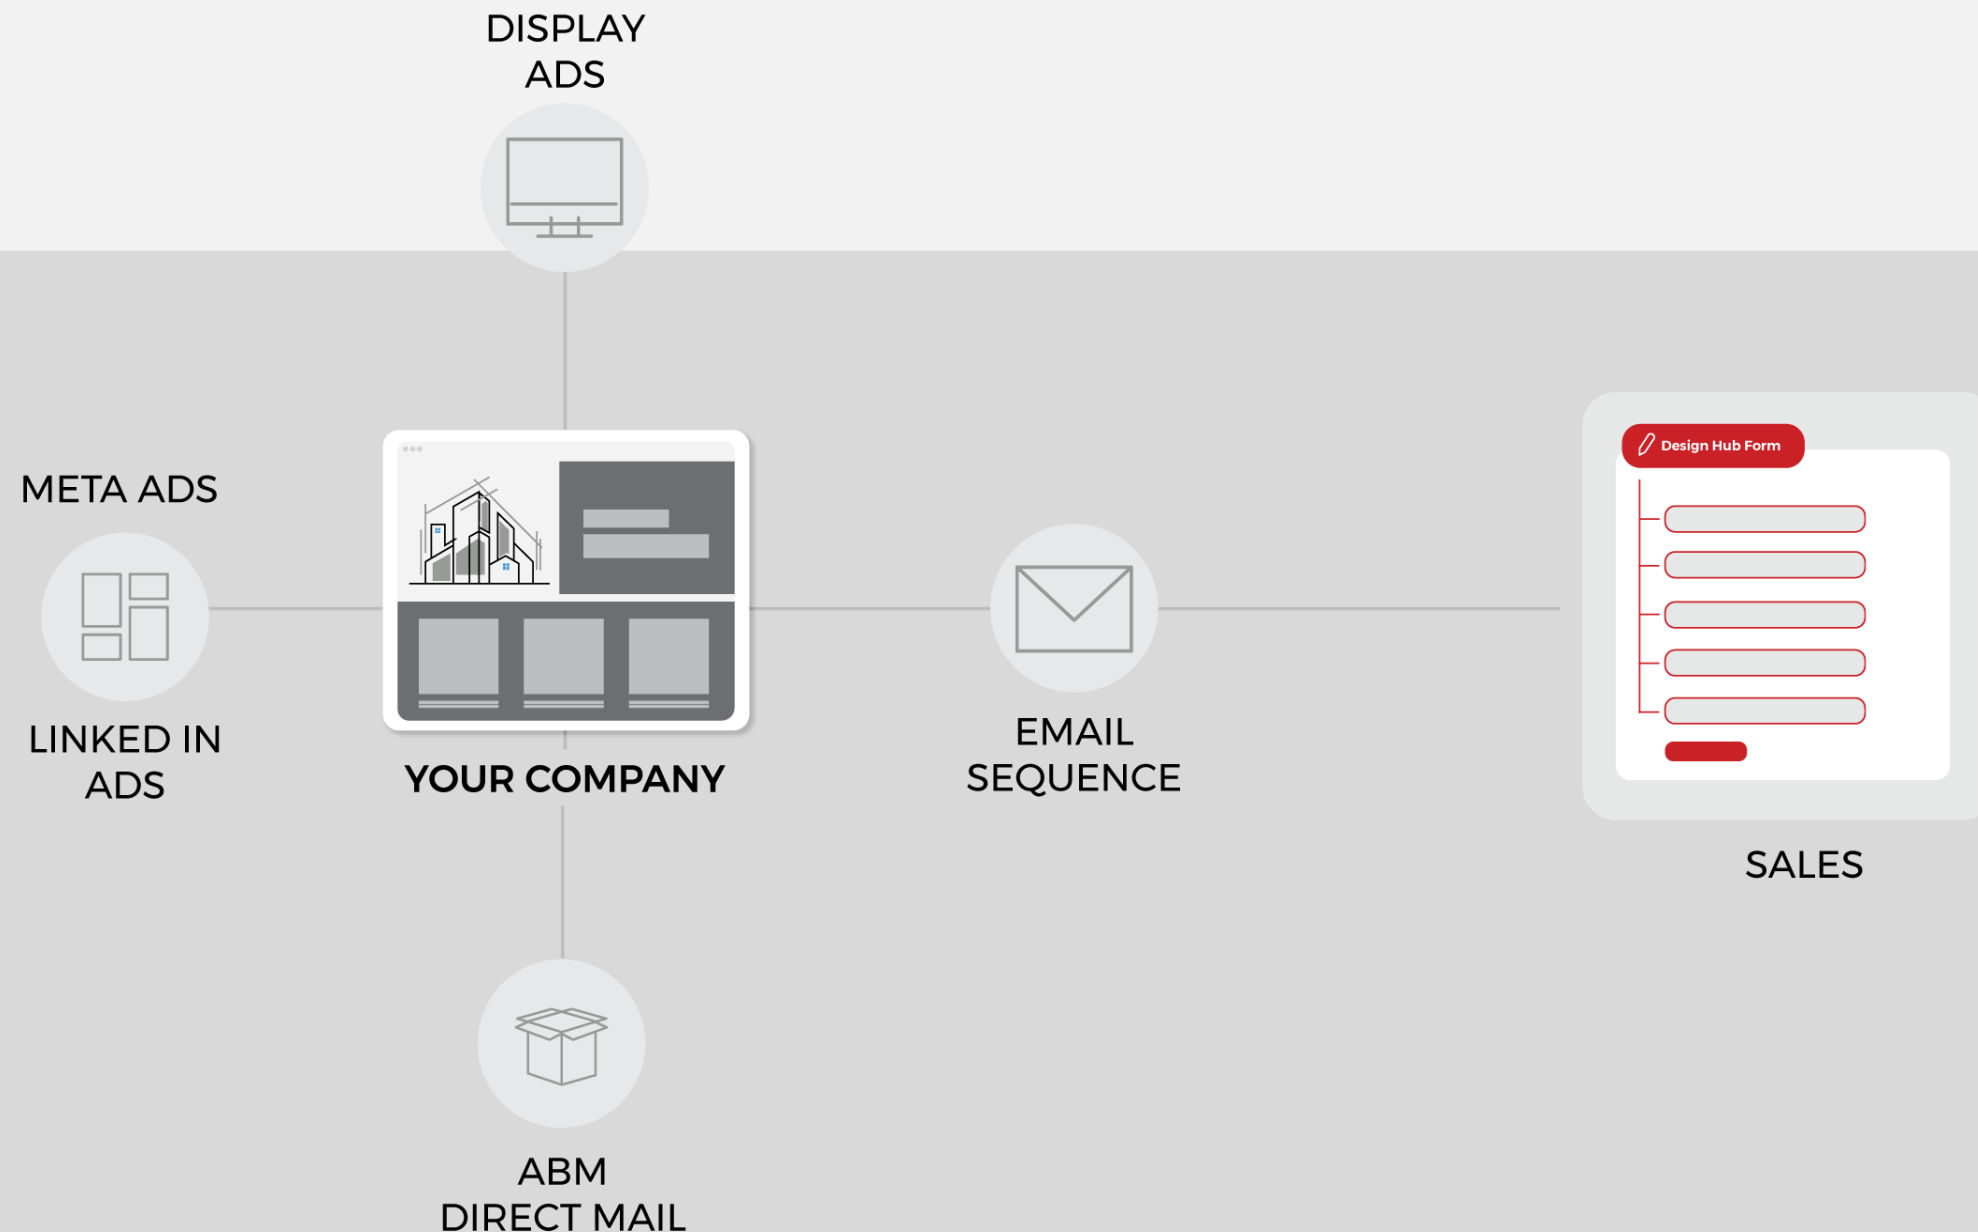

Our GA4 integration is a powerful tool that provides a detailed understanding of every customer interaction with your business. This invaluable contact-level information enables you to pinpoint the top professions and personas interacting with your content, empowering you to make informed business decisions.

Unique AEC Data

Use insights from proprietary data to refine your business and product strategies.

Enhance Your CRM

Export your Design Hub data and upload it into your CRM. This information can greatly enrich your CRM database, unlocking new opportunities for your marketing and sales strategies.

Level-Up Your ABM Activities

Account-Based Marketing (ABM) is a targeting strategy where sales and marketing teams focus on a select few high-value accounts. This approach allows your team to predict specifier behavior that may not be easily visible otherwise, better qualify potential firms at the beginning of their product discover, and nurture them throughout the purchasing process. Harness the power of personalization by using this data for targeted email and advertising campaigns via custom and lookalike audience options aimed at your in-market accounts.

Unique AEC Data

Use insights from proprietary data to refine your business and product strategies.

Insight into Potential Projects

Discover which projects your products are being specified in, helping you to better qualify potential opportunities and refine your marketing and sales follow-up strategies.

		designhub	Google Analytics 4

	Geolocation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Profession	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Insight into products and other content users are engaging with. Detailed activity summaries and raw data	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Product Inquiries and Intent	Projects your users are working on → Project Name → Project Location	<input checked="" type="checkbox"/>	<input type="checkbox"/>

GA4 vs. Design Hub Data

While Google Analytics offers a comprehensive range of metrics for free, it's important to recognize that GA's script-level data has limitations regarding the level of detail and the accuracy of the information it provides.

With Design Hub, you can perform a detailed traffic analysis using first-party data from your branded site. This analysis reveals not only the number of contacts but also the firms viewing your products, offering invaluable insights that can significantly impact your marketing strategies and business decisions.

Save Time & Resources

Save time on site updates and development by letting our team manage your technical products and content for you.

Save Cost & Resources

Extension of Your Team

Our team is your collaborative partner dedicated to understanding and addressing your unique needs. With a fully North American-based team, we offer the advantage of local presence, ensuring quick turnaround times and clear communication.

Turnkey Solution

With a product site ready for AEC use, you can hit the ground running and accelerate your time to market. No development, creative, or internal resources are needed.

Save Cost & Resources

No Google Tag Manager Experience Needed

Gain insights into your Design Hub metrics without needing technical knowledge of Google Tag Manager.

Save Costs

By opting for our turnkey solution, you can significantly cut expenses. There's no need to invest in costly agencies or contractors to build, maintain, and manage tools like Google Tag Manager, your product content, or your website. This cost-saving approach can have a substantial impact on your bottom line.

Promotion Strategies

Further, boost the effectiveness of Design Hub with simple promotion tactics.

On Your Website:

- Main Website Menu
- Website Footer
- Resources
- Product page

Ad Campaigns:

Run AEC focused ads that lead to your Design Hub.

Social Media:

Run AEC focused social campaigns, like contests or hashtag initiatives, to increase awareness of featured projects, products, or new releases.

Employees:

Incorporate Design Hub into employee signatures to drive traffic to it during customer communications.

Onboarding & Support

The setup process for the Design Hub is effortless, enabling your team to easily integrate it into your website and start benefiting from its features right away. Our dedicated client success team offers continuous, personalized support throughout your entire experience.

Step 1

Branding

- Provide Brand Guidelines or Collateral Reflective of your Branding
- Customized Images
- Detailed Company Description
- Logo

Step 2

Product Files

- Product Images
- Detailed Design Documents (DWG/REVIT/SKP and more)
- Supporting Product Information (Brochures, 3-Part Specifications, Color Sheets, Data sheets and more!)

Step 3

Project Information

- Detailed Project Description Including Architect/Contractor Information, Location, Year and Estimated Costs
- Project Images
- Supporting Documents

Step 4

Receive Continuous Support

On-going support for assistance with organization, troubleshooting, updating and maintaining your files

If you are already an existing CADdetails client, we will migrate your files over for you!

Why Customers Love Design Hub

“The Design Hub design is modern and clean.”

Tammie Stimpfel, Marketing Coordinator Blue Thumb

“Very nice – very intuitive and easy to navigate!

Lori Statler, Inside Sales Manager, Heat & Glo

“Everything looks great and is intuitive from a user-experience standpoint!”

Lisa Annis, Marketing Cre8Play

“Love the look of Design Hub, excited for the analytics dashboard and all new capabilities!”

Missy Ramberg, Marketing Director, Acuraft
